SUMMARY

Information Systems graduate specializing in Cybersecurity and Data Analytics. Demonstrated Data Analyst experience at **PT Dirgantara Indonesia** alongside hands-on expertise in Linux administration, OSINT, and bug bounty hunting. A detail-oriented leader eager to drive secure, data-informed solutions in dynamic IT security teams.

WORK EXPERIENCE

Data Analyst

June 2025 – August 2025

PT Dirgantara Indonesia | Internship | Bandung

- Analysed and transformed enterprise datasets using Power BI to build interactive dashboards, simplifying complex data for internal decision-making.
- Designed intuitive, user-friendly visual reports and infographics to communicate key operational metrics effectively to stakeholders.

SKILLS

- **Programming & Frameworks:** PHP, Laravel, SQL, Bootstrap, Tailwind
- **Security & Infrastructure:** Kali Linux, Rocky Linux, Cisco Packet Tracer, Amazon Web Services (AWS)
- **Monitoring and Security:** Zabbix, Grafana, Prometheus, Wireshark, OWASP ZAP (Zaproxy), Burp Suite, SQLMap
- **Data Analytics:** Power BI, Tableau, Looker Studio, Aiven, SQL
- **Design & Multimedia (Secondary):** Clip Studio Paint, Adobe Photoshop, Adobe Premiere Pro, Canva, CapCut
- **Soft Skills:** Leadership, Communication, Attention to Detail, Project Management, Collaboration
- **Languages:** Bahasa Indonesia (Native), English (CEFR Level B2)

CERTIFICATION

- **Cyber Security Analyst** | BNSP | November 2025
- **English Proficiency Test** | LAC Telkom University | November 2025

EDUCATION

Telkom University

August 2022 – August 2026

Bachelor of Information Systems | GPA 3.4 / 4.00

- Specialization in Cybersecurity and Network Engineering.
- Thesis on "Implementation and Analysis of Bug Bounty Framework on City Level Government Website".

AWARDS

Capstone Design Project 2026 Telkom University

January 2026

Best Product 2 Sistem Informasi | Capstone Design Project 2026

- **Recognition & Impact:** Awarded 2nd Best Product in Information Systems for AI automation in healthcare retail.
- **Key Achievement:** Recognized for successfully optimizing customer response times and digitizing inventory lookup.

ORGANIZATION EXPERIENCE

Practicum Assistant Sisjarlab Bandung	September 2025 – January 2026
• Instructed security labs covering SHA hashing, encryption, antivirus, and SQL Injection. • Facilitated web penetration testing modules and evaluated student performance.	
Lab Assistant Enterprise Infrastructure Management (EIM) Research Lab Bandung	January 2025 – January 2026
• Delivered workshops and presentations on core Cybersecurity and Networking concepts. • Created educational social media content focused on network security and threat awareness.	
Student Activity Unit Division Coordinator Nippon Bunka-Bu Bandung	December 2024 – December 2025
• Coordinated external communications and partnerships with outside organizations to support outreach. • Led visual design creation and media documentation for all UKM events and official activities.	
Student Activity Staff Balon Kata! Bandung	December 2024 – December 2025
• Documented all instructional class activities to support internal archives and promotional media. • Designed engaging visual content for social media publications and event branding materials.	
Student Activity Staff Nippon Bunka-Bu Bandung	December 2023 – December 2024
• Assisted in managing external communications and outreach with partner organizations. • Produced visual content and assisted in media documentation for internal events.	

PROJECTS

Analysis And Implementation of Bug Bounty Hunting Framework on City Level Government Website Final Thesis	
• Key Findings: Security analysis of 12 subdomains on government website confirmed 28 true positive vulnerabilities (57.14%), primarily driven by outdated JavaScript libraries and missing security headers. • Recommendations: Municipal authorities should patch vulnerable software libraries, implement robust web server security headers, and adopt the bug bounty framework for continuous vulnerability assessments.	
Proses Data Mining dan Dashboard Data Menggunakan Python Streamlit dan Power BI untuk PT. Dirgantara Indonesia Internship Project PT. Dirgantara Indonesia	
• Data Mining & Predictive Modeling: Processed, cleaned, and standardized unstructured aircraft maintenance logs using Python (Streamlit) while training machine learning models to forecast component failures and repair schedules. • Interactive Business Intelligence Dashboards: Developed dynamic Power BI dashboards to visualize maintenance historical trends, material usage, and predictive failure insights to support data-driven decision-making.	
Peningkatan Efektivitas Pada Customer Relationship (CRM) Pada Bidang Customer Service Untuk Apotek Zulkarnain, Bekasi Capstone Design Project Apotek Zulkarnain	
• AI Integration: Connected n8n, Fonnte WhatsApp API, and Gemini LLM to automate customer support and inventory queries. • CRM Engineering: Designed a Waterfall-based CRM workflow to automate interaction logging and query routing.
